

James E. Broadnax

James E. Broadnax, (Jim) who holds an MBA, had a successful career of 21 years as a Manager and Team Leader at General Electric Company. He developed high-performance work units, primarily to build jet engines. He also taught computer technology and information systems at Northeastern University in Boston for 9 years. His civic life has been as full as his professional career, serving as the President of the Community Brotherhood Club of Lynn, MA, and a Board member of the Salem State College Foundation. He has maintained an active leadership role in the Fellowship of Independent Global Churches and Ministries and the World Bishops' Council. Jim also founded Bear Computer Systems, which provided computer sales and repair services, office automation and information services to small businesses. His interest in Internet Marketing grew out of his appreciation for the online shopping and leveraged income. He is the founder of the team described in Team-Home.com. Recently he closed the doors of Bear Computer Systems so he could devote himself full-time to his growing home-based Internet Marketing Business.

The following aircraft engines Jim worked on during his 21 years at General Electric, T700 helicopter, F414 and F404 used on the F18 aircraft and the CF6 engine used on the Boeing 747.

In the last five years Jim has been specializing in internet marketing. Within this area he has developed systems to produce new streams of revenue for towns, cities and other non-profit corporations. He is actively implementing this system in towns in Massachusetts at the present time.
